

Innovative Infrared Imaging.

Telops Inc., founded in 2000 and located in Quebec City, Canada, is a company specializing in the design and manufacturing of hyperspectral imagers and high-performance infrared cameras for defence, industrial, and academic research applications. Telops also offers R&D services for optical systems technology development in order to respond to the specific needs of its customers. Since we are currently growing, and are seeking a:

## **Electronics Technician**

Full-time permanent position (37.5 hours) – Quebec City, Canada

Under the responsibility of the Production Technical Leader, the candidate will play an important role within the team in the production of electro-optical subsystems. He will also be greatly involved in the continuous improvement of product production processes as well as in the various Telops projects.

More specifically, the incumbent will have to:

- Perform assembly of electro-optical subsystems in production;
- Perform tests of electro-optical subsystems in production;
- Start, modify and repair electronic boards;
- Contribute to the introduction of new products in production and the improvement of existing products;
- Support project teams in the design of wiring drawings;
- Create and update hardware lists for assemblies in the manufacturing software;
- Document his work according to established standards;
- Write technical reports in English and French;
- Write test and assembly procedures;
- Perform entry inspections on critical equipment;
- Support purchases for validation of nonconformities;
- Participate in the improvement of our work practices.

We particularly request the candidacy of enthusiasts demonstrating abilities to work in team synergy, open-mindedness, a strong sense of responsibility, organization, resourcefulness. In addition, the candidate must demonstrate professional maturity and self-confidence. Finally, he must be able to highlight a logical and chronological sequence during his analyzes, a specific habit for the documentation of his work as well as a constant concern for accuracy and precision.

The requirements for this job are the following:

- A diploma in industrial electronics technology or any other relevant discipline;
- A minimum of five (5) years in a similar technical function in an R&D environment;
- Be eligible for security clearance from the Canadian government (secret level);
- Good command of computer tools and software: Matlab, Orcad, SAP Business One, Microsoft Office Suite, etc.

In order to submit your application, please send your resume as well as an application letter to the following address: [rh@telops.com](mailto:rh@telops.com)
