

Innovative Infrared Imaging.

Telops Inc., founded in 2000 and located in Quebec City, Canada, is a company specializing in the design and manufacturing of hyperspectral imagers and high-performance infrared cameras for defence, industrial, and academic research applications. Telops also offers R&D services for optical systems technology development in order to respond to the specific needs of its customers. Since we are currently growing, and are seeking a:

R&D Technician

Full-time permanent position (37.5 hours) – Quebec City, Canada

Under the responsibility of the System Technical Leader, the candidate will play an important role within the team in the design of electro-optical subsystems. He will also be greatly involved in Telops' various R&D projects through all the stages of product development: design, qualification and transition to production.

More specifically, the incumbent will have to:

- Participate in qualification tests for new products.
- Perform the assembly of electro-optical subsystems.
- Perform tests of electro-optical subsystems.
- Contribute to the introduction of new products in production and the improvement of existing products.
- Create and update hardware lists for assemblies in the manufacturing software.
- Document his work according to established standards.
- Write technical reports in English and French.
- Write test and assembly procedures.
- Participate in the improvement of our work practices.
- Ensure the proper management of R&D equipment and laboratories.

We particularly request the candidacy of enthusiasts demonstrating abilities to work in team synergy, open-mindedness, a strong sense of responsibility, organization, resourcefulness. In addition, the candidate must demonstrate professional maturity and self-confidence. Finally, he must be able to highlight a logical and chronological sequence during his analyzes, a specific habit for the documentation of his work as well as a constant concern for accuracy and precision.

The requirements for this job are the following:

- A diploma in industrial electronics technology or any other relevant discipline;
- A minimum of five (5) years in a similar technical function in an R&D environment;
- Be eligible for security clearance from the Canadian government (secret level);
- Good command of computer tools and software: Matlab, Orcad, SAP Business One, Microsoft Office Suite, etc.

In order to submit your application, please send your resume
as well as an application letter to the following address: rh@telops.com
